

A View From The Field

We've spent quite a bit of time in the field the past few months. Our team has met with dozens of clients as well as attending ad: tech, Interop, the Internet Retailers Expo and several highly focused channel conferences.

Despite current economic conditions, we see many of our clients investing in securing key leadership talent and building market share.

New technologies and more effective and efficient use of current technologies are supporting continued growth in many sectors including security and storage. With a new array of products and services in the mobile and wireless markets, rapid growth in the Internet content arena and sustained growth in Business Process consulting and outsourcing services; sustained growth is expected.

Recent Success Stories
